

Airfoil 9100 Goggle Instructions

Removing Lenses:

1. Push lens out firmly from the inside of the goggle near the nose bridge using thumbs. Lens will pop out, but will remain attached to the frame at the opposite end.

2. From the outside of the frame pull the lens towards the nose-bridge so that the tabs slide out of the slot.

Installing Lenses:

1. Insert lens tabs into the outer slot of the frame by carefully sliding tabs into the open slot and snap into place.

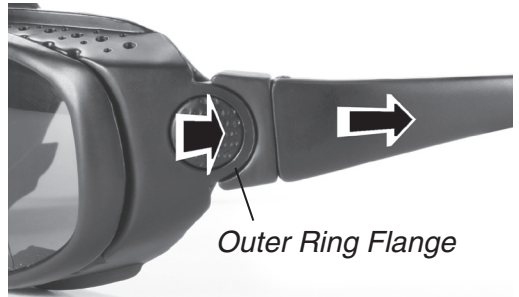

2. Then firmly press on the opposite end of the lens to snap the other tabs into the slot by the nose-bridge.

Removing Arms/Straps:

1. Press firmly on the dimpled release button located on the outer part of the frame near the arm hinge. Pull on the arm and wiggle as you press the button towards the outer ring flange. The button will slide under the flange as you pull on the arm.

Installing Arms/Straps:

1. Slide the dimpled button on the arm or strap under the ring flange of the frame. The button will snap securely into place.
